# DIESEL GENERATOR SET MTU 16V2000 DS1250 PRIME POWER: 1135 KVA

380V - 415V/50 Hz/Air Charge Air Cooling

# **PRODUCT HIGHLIGHTS**

#### // Benefits

- Low fuel consumption
- Optimized system integration ability
- High reliability and availability of power
- Long maintenance intervals
- Optimized ratio between size and power
- Wide operating range without derating

#### // MTU Onsite Energy is a single-source supplier

#### // Global product support

#### // Standards

- Engine-generator set is designed and manufactured in facilities certified to standards ISO 2008:9001 and ISO 2004:14001
- Generator set complies to G3 according to ISO 8528
- Generator meets NEMA MG1, BS5000, ISO, DIN EN and IEC standards
- NFPA 110

#### // Power Rating

- System rating: 1135 kVA
- Accepts rated load in one step per NFPA 110
- Generator set complies to G3 according to ISO 8528-5
- Generator set exceeds load steps according to ISO 8528-5

#### // Performance Assurance Certification (PAC)

- Engine-generator set tested to ISO 8528-5 for transient response
- 75% load factor for prime power applications
- Verified product design, quality and performance integrity
- All engine systems are prototype and factory tested

#### // Complete range of accessories available

- Control panel
- Circuit breaker/power distribution
- Fuel system
- Fuel connections with shut-off valve mounted to base frame
- Starting/charging system
- Exhaust system
- Mechanical radiator
- Container and Canopy

#### // Emissions

- Fuel consumption optimized
- TA-Luft, Tier 2 and NEA (ORDE) optimization optionally available

#### **//** Certifications

- CE certification option
- German Grid Code Certification (BDEW) option

\* cos phi = 0,8

#### // Engine

- 4-Cycle
- Standard single stage air filter
- Oil drain extension & shut-off valve
- Full flow oil filters
- Closed crankcase ventilation
- ADEC electronic isochronous engine governor
- Common rail fuel injection
- Dry exhaust manifold
- Electric starting motor (24V)
- Fuel consumption optimized engine
- □ TA-Luft optimized engine
- □ Tier 2 optimized engine
- $\square$  NEA (ORDE) optimized engine

#### // Generator

- NEMA MG1, BS5000, ISO, DIN EN and IEC standards
- Self-ventilated
- Superior voltage waveform
- Solid state, volts-per-Hertz regulator
- Ingress protection IP 23
- 3 phase voltage sensing
- 3% maximum harmonic content
- 2/3 pitch stator windings

- No load to full load regulation
- ±0.25% voltage regulation no load to full load
- Brushless alternator with brushless pilot exciter
- 4 pole, rotating field
- Sustained short circuit current of up to 300% of the rated Prime Power/ Continuous Power current for up to 10 seconds (Marathon Generators)
- Sustained short circuit current of up to 300% of the rated current for up to 10 seconds (Leroy Somer Generators)

- Marathon low voltage generator
- Leroy Somer generator
- □ Oversized generator

## STANDARD AND OPTIONAL FEATURES, CONTINUATION

#### // Cooling System

- Jacket water pump
- Thermostat(s)
- Air charge air cooling

#### // Control Panel

- Pre-wired control cabinet for easy application of customized controller (V1+)
- □ Island operation (V2)
- □ Automatic mains failure operation with ATS (V3a)
- □ Automatic mains failure operation incl. control of generator and mains breaker (V3b)
- □ Island parallel operation of multiple gensets (V4)
- □ Automatic mains failure operation with short (< 10s) mains parallel overlap synchronization (V5)
- □ Mains parallel operation of a single genset (V6)
- □ Mains parallel operation of multiple gensets (V7)

#### // Circuit Breaker/Power Distribution

- □ 3-pole circuit breaker

- Mechanical radiator
- □ lacket water heater
- □ Basler controller
- Deif controller
- Complete system metering
- Digital metering
- Engine parameters
- Generator protection functions
- Engine protection
- SAE J1939 engine ECU
- communications
- Parametrization software
- Multilingual capability
- Multiple programmable contact inputs
- Multiple contact outputs
- Event recording
- IP 54 front panel rating with integrated gasket

- □ Different expansion modules
- **D** Remote annunciator
- Davtank control
- Generator winding temperature monitoring
- □ Generator bearing temperature monitoring
- □ Differential protection with
- multi-function protection relay
- □ Modbus RTU-TCP gateway

- □ 4-pole circuit breaker
- □ Manual-actuated circuit breaker Electrical-actuated circuit breaker
- Base frame mounted circuit breaker □ Stand-alone circuit breaker in
- separate switch box

#### // Fuel System

- Flexible fuel connectors mounted to base frame
- □ Fuel filter with water separator
- Switchable fuel filter with
- water separator

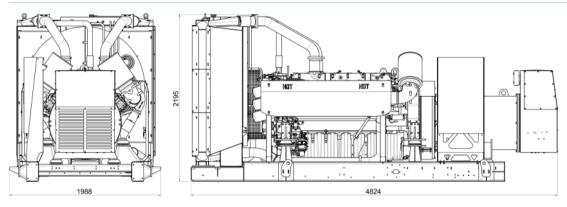

□ Fuel cooler

| Exhaust silencer with 30 dB(A) sound attenuation |  |                           |

#### WEIGHTS AND DIMENSIONS

Drawing above for illustration purposes only, based an standard open power 400 Volt engine-generator set. Lengths may vary with other voltages. Do not use for installation design. See website for unit specific template drawings.

| System                | Dimensions (LxWxH)    | Weight (dry/less tank) |
|-----------------------|-----------------------|------------------------|
| Open Power Unit (OPU) | 4830 x 1990 x 2200 mm | 7100 kg                |

Weights and dimensions are based on open power units and are estimates only. Consult the factory for accurate weights and dimensions for your specific engine-generator set.

# SOUND DATA

// Consult your local MTU Onsite Energy distributor for sound data.

# **EMISSIONS DATA**

// Consult your local MTU Onsite Energy distributor for emissions data.

# RATING DEFINITIONS AND CONDITIONS

// Prime power ratings apply to installations where utility power is unavailable or unreliable. At varying load, the number of generator set operating hours is unlimited. A 10% overload capacity is available for one hour in twelve. Ratings are in accordance with ISO 8528-1, ISO 3046-1, BS 5514 and AS 2789. Average load factor: ≤ 75%. Operating hours/year: unlimited

// Deration factor:

Altitude: Consult your local MTU Onsite Energy Power Generation distributor for altitude derations. Temperature: Consult your local MTU Onsite Energy Power Generation distributor for temperature derations.

Rated power is available up to 40°C and 400m above sea level for fuel consumption optimized generator sets. Rated power is available up to 25°C and 100m above sea level for emission optimized generator sets.
